Re: Request for ECCN (Export Control Classification Number)

From: David Dougherty, Global Director of EHS

To whom it may concern:

The United States Bureau of Industry Security (BIS) issues ECCN numbers for products that are exported. The ECCN describes the items and indicates licensing requirements for the product. All ECCNs are listed in the Commerce Control List (CCL). Weld-On[®] PVC, CPVC and ABS solvent cements and primers for plastic piping systems are not included on the CCL. As a result, they are given the general classification of EAR99. Products classified as EAR99 do not require a license in most situations. However, if you plan to export an EAR99 item to an embargoed country, to an end-user of concern, or in support of a prohibited end-use, you may be required to obtain a license.
