

See the difference FlowGuard® Glow CPVC one step solvent cement makes on your next job.

Weld-On® Introduces FlowGuard® Glow CPVC Solvent Cement

Joint inspection is now easier than ever with FlowGuard® Glow CPVC one step solvent cement. This new cement incorporates a unique identifying system to help inspect solvent welded joints. The cement goes on the pipe yellow and glows fluorescent blue under ultraviolet light, providing a double guarantee for identifying solvent cemented joints. As a result, FlowGuard® Glow CPVC pipe cement helps ensure your plumbing systems perform flawlessly.

No UV-A Light With UV-A Light

Exceptional product performance:

- Formulated for copper tube size, CPVC piping systems with interference fit up to 2-inch diameter.
- Easy one step application. No primer needed unless required by local plumbing code.
- Applicable for use in potable water distribution systems, hot and cold, up to 180°F.
- Fast setting for quick installation time.
- Medium bodied viscosity.
- Low VOC emission to the environment.
- Meets ASTM D-2846 and F-493 standards.
- NSF and UPC listed for potable water use.
- 2 years shelf-life.
- Contact your Lubrizol or Weld-On® representative for information on how to order the UV-A light kit.
